136 Bottles Wine Cooler

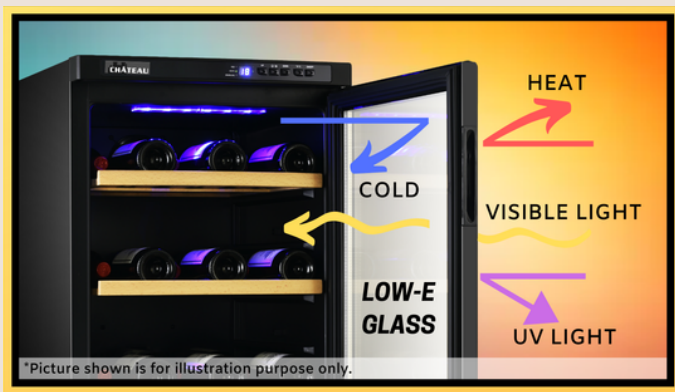

SPECIFICATIONS

- Capacity : 136 Bottles* (416L)
- Types : Free-Standing / Built-In
- Refrigerant : R600a
- Adjustable Temperature
 - Upper: 5 - 10°C
 - Lower: 10 - 18°C
- Dimensions : H1763 x W595 x D672.5mm

FEATURES

1. Black Stainless Steel Glass Frame
2. UV-Insulated Double Glass Door
3. Low Emissivity Coating (Low-E)
4. Dual Temperature Zone
5. Reversible Door
6. LCD Touch Control + Temperature Display (Located inside)
7. LED Interior Light
 - White, Blue, Orange
8. Adjustable Light Brightness
9. Lighting Mode Options
10. 8 Wooden Shelves
11. Charcoal Filter
12. Door Lock
13. Door Alarm

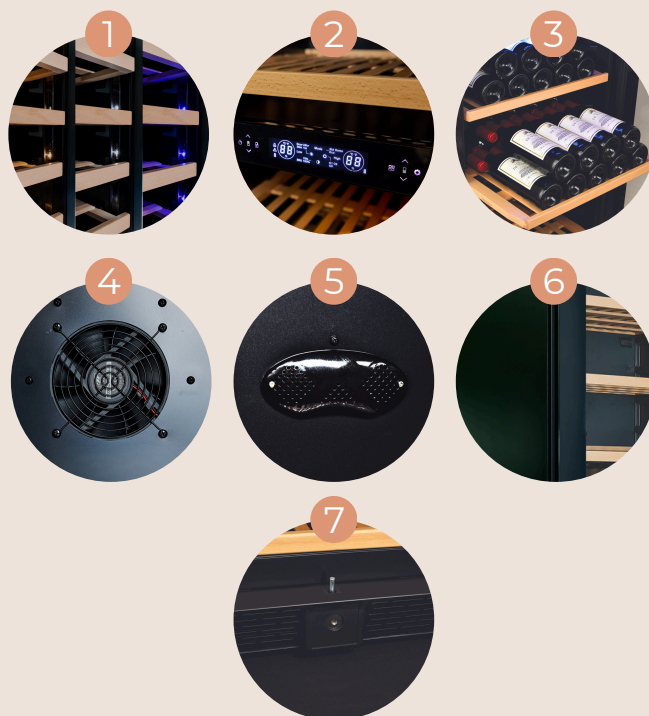

Low Emissivity Glass (Low-E)

The Low-E coating on our wine cooler glass door minimises the amount of infrared and UV light that come through the glass, without minimising the amount of light that enters the cooler.

It reflects the heat from the outside and the cold air back inside. This will keep the temperature in the cooler much more consistent as the loss of cool air inside as well as the heat transfer from outside through the glass door is minimized significantly.

With the combined stable temperature and minimal energy transfer through the glass door, the cooling system has to work less to maintain the temperature settings, making it more energy efficient!
